

Beach Clean September 18th 2011

The weather could have been nicer for it, but such is the luck of the draw in the ones planned by the Marine Conservation Society. We had 10 people come along for this event, it was a shame it was not more, but surprisingly enough it was enough people for the amount of litter we picked up. A total of 4 bags containing a lot of broken glass, iron, bottle tops, drinking bottles and 2 car tyres dumped on the shore, (it's sad to see what gets dumped on the shore)

We had a good time though and were able to stay dry and clear the litter away, maybe next year move further westwards to the Kenwood Road area?

A BIG THANK YOU, to all those that participated and hope to see you again next year

John Morgan
